DO NOT MAKE CHANGES OR ALTERATIONS TO ANY PARTS OF A FIREARM. USE ONLY REMINGTON PARTS. NEVER MAKE AN ADJUSTMENT TO THE TRIGGER, OR CHANGE THE SHAPE OR SIZE OF THE SEAR, SEAR NOTCH, OR OTHER PARTS.

Ten Commandments of Shooting Safety

- 1. Always keep the muzzle pointed in a safe direction.**
- 2. Firearms should be unloaded when not in use.**
- 3. Don't rely on your gun's "safety".**
- 4. Be sure of your target and what is beyond it.**
- 5. Use correct ammunition.**
- 6. If your gun fails to fire when the trigger is pulled, handle with care!**
- 7. Always wear eye and ear protection when shooting.**
- 8. Be sure the barrel is clear of obstructions before shooting.**
- 9. Do not alter or modify your gun, and have guns serviced regularly.**
- 10. Learn the mechanical and handling characteristics of the firearm you are using.**

Remington

Autoloading Rifle, Model 24

Chambered for the regular ".22 Short" cartridge.

makes it ready for the next shot. The magazine holds 15 cartridges which may be fired as fast as the operator desires.

Like other Remington firearms, the Model 24 has the hammerless, solid breech construction that is so effective in keeping dirt, rain or twigs from entering the action. Ejection from the underside of the receiver keeps the empty shells out of the line of sight and away from the shooter's face.

The same strong, interrupted thread system of take-down as used in Remington Repeating Shotguns insures the rigid alignment of barrel with receiver when assembled. The barrel may be removed instantly without the use of tools and permits the cleaning of the barrel from the breech in the proper manner.

THE new Remington (.22 Short) Autoloading Rifle, Model 24, is the ideal arm for the rifle enthusiast, camper, hunter, motorist, trapper and shooting gallery proprietor. For a vacation trip it will provide a great deal of pleasure and also serve as a practical arm for the securing of all game.

The Model 24 is the first Autoloading rifle to handle successfully the popular standard ".22 Short" Smokeless Greased or Smoke cartridge. This cartridge is so popular that it may be obtained anywhere, even the crossroads store in the backwoods.

The autoloading feature, which is prompt and dependable, makes possible rapid firing moving game or targets. It is only necessary to pull the trigger for each shot. The coil ejects the fired shell, loads the rifle and

Take-down simple and quick. Push barrel lock forward, pull breech block rearward, give barrel quarter turn and remove.

Action instantly removable for cleaning. Push trigger plate forward and withdraw with breech block.

The regular ".22 Short" Smokeless Greased or Smoke cartridge.

MODEL 24 AUTOLOADING RIFLE

Solid Breech	Hammerless	Take-down
Made for Standard .22 Caliber Short Cartridge Only	Bottom Ejector	

THE Model 24 Remington Hammerless Autoloading Rifle is the product of latest design, especially intended to meet the demand for an autoloading small caliber rifle, for shooting gallery and other short range purposes, which will successfully handle the standard .22 caliber short cartridge.

This model embodies all the popular features of the modern autoloading rifle and in addition can be very easily dismounted for thoroughly cleaning and oiling the barrel and action.

It is provided with convenient safety devices, and highly recommended for all who desire a reliable arm.

REMINGTON ARMS COMPANY, Inc.

25 Broadway, Gunard Building
NEW YORK CITY

Model 24 .22 Caliber Autoloading Rifles

Chambered for two Cartridges .22 Short or .22 Long Rifle Cartridge.
Not Interchangeable.

Solid Breech	Hammerless	Take-Down
--------------	------------	-----------

THE new Remington Model 24, is the first autoloading rifle to successfully handle .22 short Smokeless Greased or Icesmoke cartridges. It is also made to take the .22 Long Rifle Smokeless or Icesmoke Cartridges.

The Model 24 has the hammerless, solid breech construction, preventing dirt, rain or twigs from entering the action which construction gives the arm a very pleasing appearance. The cartridges may be fired as fast as desired, by pulling the trigger for each shot. The recoil ejects the fired shell, loads the rifle, making it ready for the next shot.

The safety is of the Cross-bolt type, conveniently located in front portion of trigger guard for operation with trigger finger.

The strong, interrupted thread system of take-down insures the rigid alignment of barrel with receiver when assembled. The barrel may be removed instantly without the use of tools, and permits the cleaning of the barrel from the breech in the proper manner. The action is simple and strong and easily taken apart for cleaning.

To put rifle together grasp receiver firmly in right hand, insert the barrel (with fore-end projecting to left) quarterwise into the receiver as far as possible, give barrel quarter turn to right until stopped. Push barrel lock, located in lower side of fore-end, into notch in receiver to prevent barrel from loosening.

To take down, push barrel lock forward, pull breech block partly rearward, give barrel quarter turn to left and withdraw. Barrel may now be cleaned from breech in proper manner.

Model 24 .22 Caliber Autoloading Rifle

Chambered for the .22 Short or .22 Long Rifle Cartridge
Not Interchangeable.

Solid Breech Hammerless Take-Down

No. 24A "Standard" Grade

SPECIFICATIONS:—19-inch Remington steel, round barrel, half pistol grip stock of American walnut, fitted with steel butt plate. Chambered to take the .22 short cartridge only or the .22 long rifle cartridge only. Specify which is desired. When chambered for .22 short, magazine holds fifteen cartridges, .22 long rifle, ten. One rifle is not supplied to take both cartridges. Sights regularly furnished; rear sight with screw adjustment for elevation and white metal bead front sight; top of receiver is matted. Length over all, 37 inches. Length taken down, 19 inches. Remington cartridges have been especially developed to give best results in this rifle and their use is strongly recommended. Greased cartridges should always be used. Weight about 4¾ lbs.

No. 24C "Special" Grade

SPECIFICATIONS:—Same as No. 24A, except that stock and fore-end are of selected imported walnut, neatly checkered. Special sights adapted to this rifle shown on pages 91, 92 and 93.

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt, \quad x \in \mathbb{R}.$$

It is shown that the function $f(x)$ is strictly increasing and concave down on the interval $(-\infty, \infty)$.

2. In the second part, we consider the function $g(x)$ defined by the equation

$$g(x) = \int_0^x \frac{t}{1+t^2} dt, \quad x \in \mathbb{R}.$$

It is shown that the function $g(x)$ is strictly increasing and concave up on the interval $(-\infty, \infty)$.

3. Finally, we consider the function $h(x)$ defined by the equation

$$h(x) = \int_0^x \frac{1}{1+t^4} dt, \quad x \in \mathbb{R}.$$

It is shown that the function $h(x)$ is strictly increasing and concave down on the interval $(-\infty, \infty)$.

The results of this paper are based on the work of the author.

$$f(x) = \int_0^x \frac{1}{1+t^2} dt, \quad x \in \mathbb{R}.$$

The function $f(x)$ is strictly increasing and concave down on the interval $(-\infty, \infty)$.
